<ti

```

4. **Warning** Self-closing tag syntax in text/html documents is [widely discouraged](#); it's unnecessary and [interacts badly with other HTML features](#) (e.g., unquoted attribute values). If you're using a tool that injects self-closing tag syntax into all void elements, [without any option to prevent it from doing so](#), then consider switching to a different tool.

From line 8, column 3; to line 8, column 54

```
/title>↵<link rel="stylesheet" href="/scss/normalize.css" />↵<li>
```

5. **Warning** Self-closing tag syntax in text/html documents is [widely discouraged](#); it's unnecessary and [interacts badly with other HTML features](#) (e.g., unquoted attribute values). If you're using a tool that injects self-closing tag syntax into all void elements, [without any option to prevent it from doing so](#), then consider switching to a different tool.

From line 9, column 3; to line 9, column 49

```
css" />↵      <link rel="stylesheet" href="/scss/main.css" />↵      <li>
```

6. **Warning** Self-closing tag syntax in text/html documents is [widely discouraged](#); it's unnecessary and [interacts badly with other HTML features](#) (e.g., unquoted attribute values). If you're using a tool that injects self-closing tag syntax into all void elements, [without any option to prevent it from doing so](#), then consider switching to a different tool.

From line 10, column 3; to line 10, column 44

```
css" /> <link rel="icon" href="img/browser.png" /> <li
```

7. **Warning** Self-closing tag syntax in text/html documents is [widely discouraged](#); it's unnecessary and [interacts badly with other HTML features](#) (e.g., unquoted attribute values). If you're using a tool that injects self-closing tag syntax into all void elements, [without any option to prevent it from doing so](#), then consider switching to a different tool.

From line 11, column 3; to line 11, column 63

```
png" /> <link rel="preconnect" href="https://fonts.googleapis.com" /> <li
```

8. **Warning** Self-closing tag syntax in text/html documents is [widely discouraged](#); it's unnecessary and [interacts badly with other HTML features](#) (e.g., unquoted attribute values). If you're using a tool that injects self-closing tag syntax into all void elements, [without any option to prevent it from doing so](#), then consider switching to a different tool.

From line 12, column 3; to line 12, column 72

```
com" /> <link rel="preconnect" href="https://fonts.gstatic.com" crossorigin /> <li
```

9. **Warning** Self-closing tag syntax in text/html documents is [widely discouraged](#); it's unnecessary and [interacts badly with other HTML features](#) (e.g., unquoted attribute values). If you're using a tool that injects self-closing tag syntax into all void elements, [without any option to prevent it from doing so](#), then consider switching to a different tool.

From line 13, column 3; to line 15, column 22

```
igin /> <link href="https://fonts.googleapis.com/css2?family=Poppins:ital,wght@0,300;0,500;0,700;1,300;1,700&display=swap" rel="stylesheet" /> <sc
```

10. **Error** Attribute `href` not allowed on element `button` at this point.

From line 53, column 7; to line 53, column 44

```
t"> <button type="submit" href="#contact">
```

Attributes for element `button`:

[Global attributes](#)

[disabled](#) — Whether the form control is disabled

[form](#) — Associates the element with a [form](#) element

[formaction](#) — [URL](#) to use for [form submission](#)

[formenctype](#) — [Entry list](#) encoding type to use for [form submission](#)

[formmethod](#) — Variant to use for [form submission](#)

[formnovalidate](#) — Bypass form control validation for [form submission](#)

[formtarget](#) — [Browsing context](#) for [form submission](#)

[name](#) — Name of the element to use for [form submission](#) and in the [form.elements](#) API

[type](#) — Type of button

[value](#) — Value to be used for [form submission](#)

11. **Error** The element `a` must not appear as a descendant of the `button` element.

From line 55, column 10; to line 55, column 28

```
<a href="#contact">Say, H
```

12. **Warning** Self-closing tag syntax in text/html documents is [widely discouraged](#); it's unnecessary and [interacts badly with other HTML features](#) (e.g., unquoted attribute values). If you're using a tool that injects

self-closing tag syntax into all void elements, [without any option to prevent it from doing so](#), then consider switching to a different tool.

From line 104, column 9; to line 105, column 8

```
" /></a>
```

13. **Warning** Section lacks heading. Consider using `h2` - `h6` elements to [add identifying headings to all sections](#), or else use a `div` element instead for any cases where no heading is needed.

From line 96, column 3; to line 96, column 42

```
ection> <section class="projects" id="projects"> <d
```

14. **Warning** Self-closing tag syntax in text/html documents is [widely discouraged](#); it's unnecessary and [interacts badly with other HTML features](#) (e.g., unquoted attribute values). If you're using a tool that injects self-closing tag syntax into all void elements, [without any option to prevent it from doing so](#), then consider switching to a different tool.

From line 161, column 7; to line 161, column 12

```
ut: <br />
```

15. **Warning** Self-closing tag syntax in text/html documents is [widely discouraged](#); it's unnecessary and [interacts badly with other HTML features](#) (e.g., unquoted attribute values). If you're using a tool that injects self-closing tag syntax into all void elements, [without any option to prevent it from doing so](#), then consider switching to a different tool.

From line 183, column 7; to line 183, column 43

```
g"> 
```

16. **Warning** Section lacks heading. Consider using `h2` - `h6` elements to [add identifying headings to all sections](#), or else use a `div` element instead for any cases where no heading is needed.

From line 133, column 3; to line 133, column 38

```
ection> <section class="about" id="aboutme"> <d
```

17. **Warning** Self-closing tag syntax in text/html documents is [widely discouraged](#); it's unnecessary and [interacts badly with other HTML features](#) (e.g., unquoted attribute values). If you're using a tool that injects self-closing tag syntax into all void elements, [without any option to prevent it from doing so](#), then consider switching to a different tool.

From line 194, column 26; to line 194, column 55

```
